The next big sensation.

Saxdor 270 GTO was designed using the Saxdor signature—the light and soft-riding twin-stepped hull—the Saxdor 270 GTO delivers speed performance and fuel efficiency well-known from the earlier models. Very deep V entry of the inverted bow reduces external impact, improving overall boat stability and enhancing the driving experience. Light and strong construction, built using vacuum infusion technique, gives you a watercraft that is trailable, and easy to launch and recover.
